

Letter from the ORGANIZERS

v-WINter 2021 International Interuniversity meeting
DUBAI, February 3-5, 2022

Connecting the Experts, Informing the Patients

A recent scientific publication pointed out a significant data: **40%** of the top shared healthcare web links contains text classified as “**FAKE NEWS**”. Even more, these fake news have been shared more than 450,000 times (*Waszak PM. et al. The spread of medical fake news in social media –The pilot quantitative study . Health Pol Tech 2018;7(2):115-18*). As always, the value of a meeting not only weighs in what it provides during the congress days, rather in what remains afterwards. The v-WINter 2021 meeting will bring together the most renowned Experts in the venous & lymphatic field from all the continents, so to create a **consensus document** on what a Phlebo-lymphology patient should receive as evidence-based information. In the previous v-WINter 2019, the focus was on **Global Guidelines similarities** and **controversies**, and the scientific work is now published as a dedicated supplement in Phlebology Journal (<https://www.ncbi.nlm.nih.gov/pubmed/31495256>). v-WINter 2021 consensus document will be in the form of an **evidence-based multi-lingual booklet**, addressed to the patients all around the world, so that they can enjoy an unbiased information on the Phlebo-lymphology management state of the art. A dedicated website will be linked to the booklet, so to allow a deeper information for both health and non-health professionals.

v-WINter 2021 project will include the **10th International Inter-university meeting**, providing an entire ballroom dedicated to the proper instruction on all the venous & lymphatic topics, delivered by the same world experts. The scientific program includes a significant amount of **valuable venous & lymphatic research**, together with a nourished selection of **free abstracts** and a direct involvement of the **youngest generations**. The event will be held during **EXPO Dubai**, in a joint effort to promote projects & initiatives dedicated to **public awareness of venous & lymphatic disorders**. With this letter we would like to invite all of you to be part of the teamwork dedicated to the creation of this as needed as beneficial for the patient document, while realizing also a top quality meeting for the benefit of the many involved health professionals from all around the world. Looking forward for your feedback, suggestions and eventual needs, we remain at your full disposal.
