VISION

to identify
V-ITAL steps
forward in
Vein & Lympahtic
care

it's V-ITALy !

In a constantly evolving technological world, being updated on the available improvements is **VITAL**.

This is particularly true whenever dealing with healthcare innovations which require expertise together with proper evidence-based validation.

Following this need, along the years **venous-lymphatic World International Network (v-WIN)** foundation has developed a global non-profit educational project focusing on three main lines of action:

1. Experts-oriented analysis of similarities & controversies in Vein & Lymphatic international guidelines (v-WINter 2019 project, <https://pubmed.ncbi.nlm.nih.gov/31495256/>).

2. Patients-oriented consensus on evidence-based fake-news free vein-lymphatic communication

(v-WINter 2022 project, <https://vwinfoundation.com/fake-news-free-project/>).

3. Moral interaction between Scientific Organizations and Industry representatives for increasing awareness on Certification & Regulatory aspects

(TRUE CARE project <https://vwinfoundation.com/true-care/>).

Primary endpoint of v-ITALY 2023 project is to gather together top Experts from all continents and top professionals from different sectors to analyse the met and unmet needs in Vein & Lymphatic practice, reaching out to the global community of Vein & Lymphatic health professionals, as well as to the patients, identifying the "**VITAL**" steps forward for a proper advancement of Vein & Lymphatic care.

The project will lead to the submission of a **scientific paper** and to the creation of an **open access digital platform**, including the topic discussed by the experts and open channels of interaction for both health professionals and patients.

"VITAL" interactions will be welcomed in v-ITALY 2023.

Science Per Aquam

VISION

Too often «**SALUS Per Aquam**» (SPA) remains an empirical activity rather than an evidence-based one. Too often synergy among different specialties is lacking in what could be the enhancement of the significant benefits the aquatic environment can bring.

«**Science Per Aquam**» is an academic international initiative focused on scientific data production and dissemination, functioning as a hub around public health education insights, related to the different medicine fields, with a primary attention to vein-lymphatic drainage.

MISSION

SCIENCE Per Aquam mission is achieved by theoretical and practical courses around the world, showcasing a model of **national** and **international** collaboration among different specialties professionals.

Main focus of May 28 event will be **venous** and **lymphatic disease**, in particular regarding the related edema management.

Moreover, an insight in the **technical hydrotherapy aspects** will provide the possibility for the attendees to actively prescribe this useful therapeutic tool.

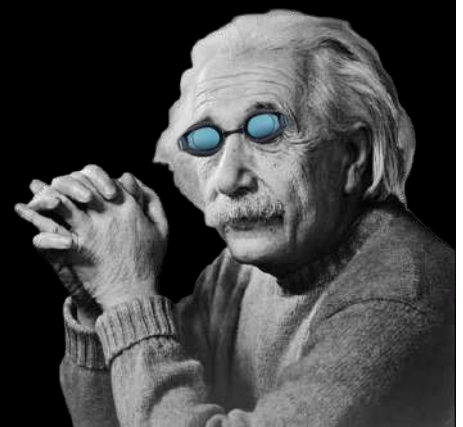

An active engagement of the **General** and **Multi-specialty Medicine** will allow the enhancement of the learning opportunity, both at a national and international level.

Theoretical and **Practical** sessions will enrich both health care professionals and population knowledge on such an important topic.

ITALIAN CME statement for **PHYSICIANS** (allergology, immunology, angiology, cardiology, dermatology, endocrinology, geriatrics, diabetology, pneumology, infectious diseases, physiatry, rehab, internal medicine, thermal medicine, aviation & space medicine, sport medicine, neurology, heart surgery, general surgery, maxillofacial surgery, plastic surgery, thoracic surgery, vascular surgery, OBGyn, neurosurgery, orthopaedics, ENT, anesthesia, general medicine, dietology, epidemiology, diving and hyperbaric medicine)

By this invitation to **join v-ITALY event** we deeply hope to invite all of you also to be part of an **educational, editorial and networking “VITAL” project** dedicated to the evidence-based understanding of **where Vein and Lymphatic practice is and where it should go**. This **“VITAL” need** will be accomplished once again only thanks to the moral and productive teamwork involving representatives of the highest scientific community, of the most reliable companies and of the non-health professionals, all together dedicated to the best patient care advancement. **The digital experience** developed along the last years will allow the reaching out to all the continents and communities. **The in person engagement of the most renowned key opinion leaders** will foster professional and personal growth, in particular during the three days of presential interaction. *“If we want to know our present, we need to look at our past. If we want to know our future, we need to look at our present actions”*: following this vision, in the present actions we are delighted to come back to **Albarella Island**, venue of the v-WIN 2017 6th international interuniversity meeting <https://vwinfoundation.com/press-gallery/>, perfect site for analysing together **what science has produced in the last years** and **what it should generate in the near future**. Looking forward for days of **“VITAL”** medical education and social sharing, we’ll be waiting for you with open arms at **v-ITALY**...and in the 2024 future at **v-WINDonesia (BALI)**.
